Professional Summary:

Aspiring Software Developer with a strong foundation in Java, C#, full-stack web development, and android development. Eager to apply skills in object-oriented programming and experience building comprehensive applications to a challenging internship role. Proven ability to work with modern technologies including Spring Boot, .NET, MySQL, and Android Studio to deliver robust, efficient, and user-friendly solutions.

Skills:

- **Language:** Java, C#, HTML, CSS, JavaScript(basics)
- **Frameworks and Libraries:** Spring Boot, Spring Security, JPA, .NET, Windows Forms, JDBC
- **Database:** MySQL
- **Developer Tools:** Git, GitHub, IntelliJ IDEA, Visual Studio, Firebase, Android Studio
- **Core Concepts:** Object-Oriented Programming (OOP), UI/UX Design (Basic), RESTful APIs, Version Control

Projects:

1. Notice Hub (Full-Stack Application)

- a. Developed a full-stack notice management system with a secure web portal for admins and an Android app for teachers and students.
- b. Implemented a multi-role architecture with Spring Security (JWT) including following features:
 - i. Notice Publishing
 - ii. Bulk Data Upload
 - iii. Semester Transfer
 - iv. Role-Based Authority Management

- v. Real-time notification using Firebase
- c. Technologies: Java, Spring Boot, Spring Security, JPA, MySQL, HTML, CSS, JavaScript.

2. Payroll Management System (*Developed in Microsoft Visual Studio (C#)*)

- a. A comprehensive desktop application developed using C# and Windows Forms, designed to manage bookshop operations efficiently.
- b. Core features:
 - i. User Authentication
 - ii. Employee Management
 - iii. Salary Management
 - iv. Reporting
 - v. Database Integration
- c. Technologies: .NET, C#, MySQL

Certification:

- Git & GitHub 3-Day Workshop

Education:

- Bachelor of Computer Engineering, Pokhara University
